Ideal for cosmetics or loose fill & liquids, this impulse sealer has been specially designed to seal stand up pouches & tubes, with Double Jaws. Fitted with a Dual Electronic Timer, for control over both heat & cool cycles.

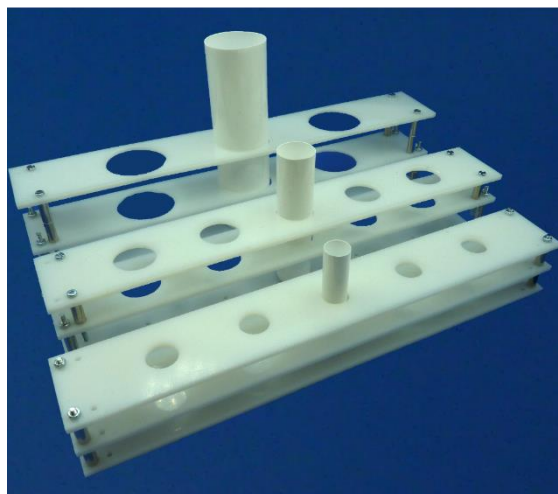

The Hold Down Lever locks into position while the welding cycle takes place, leaving the operator free to load the next bag to improve productivity.

Both the Jaws move simultaneously to ensure they close around the bag without distortion. Each jaw is fitted with a 6mm Element, applying the heat from both sides of the bag - ensuring a high quality seal on laminated pouches and tubes.

Tube Holders can be manufactured so up to 5 tubes can be welded simultaneously.

The height of the sealing jaws is adjusted with 2 Tri-Screws on the back of the machine, so the machine slides along the H-Frame, upright for infinite adjustment.

Larger H-frame stands can be manufactured to meet your requirements.
